SQUARE-THROAT

DROP-FORGED STEEL "C" CLAMPS

STYLE NO. 84

WORKING ADVANTAGES

Style No. 84 features much greater than normal depth-of-throat, combined with the advantages of drop-forged steel frames. These square-throat "C" clamps provide the extra depth of throat, or "reach", needed wherever clamping pressure is required well away from the edge of the work. Their drop-forged, heat-treated steel frames are designed and guaranteed to withstand the extra leverage involved, offering the greatest possible strength for the weight. They relieve the clamp user from the necessity of using "C" clamps of larger-than-desired opening capacity in order to gain greater-than-usual-depth of throat.

SPECIFICATIONS

Frames: STEEL, drop-forged in dies, and heat-treated. Foot is machined plane. Hubs are extra long, for greatest wear.

Swivels: Turned STEEL, ball-and-socket type, of exclusive (patented) design, put on to stay! Will not come off even under the most severe kind of service.

Screws: STEEL, heat-treated, of adequate diameters for the loads intended.

Handles: STEEL, sliding vise-type as illustrated.

stock no.	opening capacity inches		depth of throat, inches	dia. of screw, inches	ship. wt. per doz. pounds	test load (minimum) pounds
	max.	min.				
8404	4	0	4½	⅝	58	4,100
8406	6	0	6½	¾	104	5,400
8408	8	0	8½	¾	146	5,900

Packed one-half dozen per carton
